ASP.NET Auto DB is an advanced form-to-database control for ASP.NET that “doesn't require any programming” and includes over 2-dozen sophisticated capabilities that make database form development a breeze. Video tutorials make learning fast and easy. Auto DB is compatible with ASP.NET 1.1 and the upcoming ASP.NET 2.0. Popular features include: Automatic detection of form fields, Dynamically uploads files, Writes to OLEDB compatible databases, Built-in auto responder, Caching for enhanced performance, CSV file creation for importing data into Excel and other popular applications, Ability to compress uploaded files, redirects users to a confirmation page, Built-in SMTP with authentication capability for sending auto responses, Recognizes ASP.NET validators and doesn't process until form is error-free, Ability to personalize auto responses, Useful debug feature, Complete documentation, Video Tutorials and No programming required!
