

ASP.NET ComboBox

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

APNSoft ComboBox is a professional replacement for the classic ASP.NET ComboBox (ASP.NET DropDownList) component. It provides a powerful, unique and useful capabilities for building web application user interface. You can use icons, separators, user-defined slider arrows, rulers, backgrounds, etc. Developed as a fully managed .NET server control it generates DHTML output using an XML source with the ComboBox structure that can be obtained from a static file or programmatically. Also, the product includes intelligent behaviour support: auto and smooth content scrolling, transition effects, etc. APNSoft ComboBox is a flexible, reliable, powerful and easy to use product. It generates compact HTML and JavaScript code and fully compatible with all popular browsers.
