

ASP.NET Download Securer Module

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Download Securer Module is an ASP.NET source code module which allows you to hide download locations from users of your website by generating unique URLs which include an ID number to authorize a user to download a file a certain number of times. Comes with easy to use API to intergrate into existing products/applications and also an admin area to manually generate download links.
