ASP.NET Free Content Management Basic CMS

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Content management system built with asp.net and ms access. Simply copy the files into a folder and it's ready to run. The file manager can upload and delete images or other documents. Edit your pages on the fly with your web browser with document preview. Unlike most content management systems, you control the complete look and feel of your pages. Basic CMS is ready to be built into existing products to add content management functionality, or works great as a main website.
