

ASP.NET Search for Index Server

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

ASP.NET Search for Index Server allows you to quickly add an advanced search facility to your Intranet or web site. With easily configurable support for multiple Catalogs, Scopes and Filetypes plus control over color-schemes and fonts via CSS, the application can be tailored to take full advantage of Microsoft Index Server (Indexing Services) and fit in with your site's design.
