The acronym WYSIWYG stands for lake for What you is what you GET and means that the author gets to see the text in such a way when editing, how he will look afterwards in the Browser of a visitor. The News center is extremely flexible and supports CoPy & paste. So far unusually, however here complete formatting cannot be taken over and stored. Try once once an article or a Tutorial directly over strg+c and strg+v to insert. The result can be able to be seen. Custom Language are supported.
