

# ASP Sheriff

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

ASP Sheriff allows you to watch and see what they see and log a visitors's activity upon request. See a list of active sessions on your website and view what they view as they browse through your website. ASP Sheriff can even enable you to watch users from within a LAN with fast session switching. You can also log a users activity to a text file on the server and review it later.
