ASPired2Refer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

ASPired2Refer is an ASP application for allowing your users to refer your pages to a friend. This is essentially a Tell-A-Friend feature. We were going to call it ASPired2Tell but that sounded like a child telling on a classmate. With ASPired2Refer, you add a link on a page and once a user clicks on the link, they will be taken to a page to enter the e-mail address to send information about the page to a friend. The e-mail that is sent is completely flexible and you can taylor it to suit your needs. Ideas for Referring Pages Refer your products Refer articles Refer videos or pictures Refer games All of the ASPired2 products include an ASPired2Refer link. It is reccommended that you use ASPired2Encode to prevent spamming.
