AspLib - Binary image

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This component is AspLib component library part. The component enables easy and simple showing and uploading images without creating additional forms, files or handlers. Image initialization on a form is carried out by the ShowImage event. When image is uploade UploadImage event is called and the image is passed to the event handler. In case of Width and Height properties being defined the image can be automatically truncated. ASP.NET AJAX supports and rich client side API.
