

AspLib - ComboBox

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This component is AspLib component library part. ComboBox provides auto-complete functionality so that when you write text in the ComboBox, it completes the text if it finds in item collection. It can be customized with styles, colors and sizes. Control supports AJAX behavior: partially items loading and fast items uploading for large items collections. ASP.NET AJAX supports and rich client side API.
