<b>Email</b>	{value_email}

The component for working with MediaGallery - provides easy access to images, flashes, movies, documents or any other files from gallery. Users may upload files to server via gallery. You can set mask for inputted file's type and maximal size of file. GalleryBox can work with a file gallery when every element of a gallery is a file in given folder. Also it can work with a gallery from MS SQL or MS Access database.
