AspLib - InputDateTime

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Components for entering dates and time with possibility of using a pop-up calendar. You can enter day or day and month (8 or 6/8) using any separator ("", ".") and control will automatically add current month and year. Date can be empty. Setting a range of dates is available. Calendar is refreshed without PostBack. Auto localization depending on application culture settings.
