This is an ASP component to resize JPEG images. Images can be saved to disk or streamed to the browser. Functionality allows for files images to be scaled by factor or resized to pixel dimensions. Simple image manipulation includes rotate, crop and flip. JPEG compression and DPI can be adjusted. Images can be read from greyscale or CMYK format. Simple commands are provided for streaming to the browser and resizing to fit a specified rectangle. Input can be accepted from a binary variable making it usable with upload components. It can be supplied bundled with our own upload component to make a complete upload and resize solution for JPEG images. Free trial available.
