ASPSMS

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

ASPSMS is an ActiveX-Component for mobile phone messaging applications. It's free software, there are no setup costs and there is no monthly fee. You pay per each SMS that you send. Send SMS to more than 200 countries and 400 mobile networks. Features include: Simple Text SMS, Multiple SMS. Delivery & Buffered notification, Operator logos, Group Logos, Ringtones. Binary SMS, Alphanummeric Originator, WAP-Push (similar to MMS). Integrate ASPSMS to all platforms through XML interface. ASPSMS brings intelligence to your SMS services. People who receive an SMS from you are now able to reply directly via SMS. The reply is received by our servers and forwarded by e-mail or HTTP-Post directly to your applications. Our two-way SMS enables cross-country, cross-operator SMS services, using a single mobile number. No more keyword hassles. Get your own personal global number for a convenient price.
