aspWebCalendar

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Now you can subscribe to your calendars right on your iPhone and receive notifications before your events! Web based calendar that looks and feels like a desktop application. Full recurring event support. .ics (iCal) event subscriptions and publishing! Subscribe to calendars from Microsoft Outlook, Google Calendar, Apple iCal, Windows Calendar, etc... Publish your calendars via .ics so users can add your .ics based calendar to their favorite PIM. Full Active Directory integration, Add/Update all the users in your system instantly with our Active Directory Sync script. New color scheme interface. Unlimited Users and Calendars. Seperate read-only website display engine to embed calendars into your website or intranet. New AJAX based rending engine cuts down on screen refreshing and makes the system nearly 70% faster... and much, much more!
