aspWebContacts

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

aspWebContacts is an .asp (Active Server Pages) script that allows you to easily create and maintain your contact database online. No configuration required. Just simply upload the script to your server and you're up and running. Highly configurable, the script supports: password protection, online editing and modification of contact records, and even allows you to import existing databases using the online administration tools.
