

AT's Dynamic Wysiwyg Editor

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A dynamically configurable wysiwyg editor. By simply logging into a PHP secured administration module you can update which features are available to your end user. Packed with features: image uploader, spell checker(IE only), all text editing, you know what just check out the demo by visiting our link and clicking on demo. Written in PHP, Javascript, and uses one MySQL database. Only 2 files to edit, both in the config file! once config files are updated just run the install.php file then erase it. Your Done Updates are available for free!
