@1 Age Status Indicator for Files and Folders

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Similar to the ones used at hotscripts.com, cgi.resourceindex.com, perlarchive.com and scriptsearch.com, this script checks the age of files and folders and shows "NEW" image or text indicators according to the age. C/w admin interface. Support 1-level or 3-level age distinction. If pointed to a folder, the script will scan through all files in that folder for newest file (sub-folders and files in sub-folders are omitted).
