A file archive plus membership access system written using PHP + MySQL. The Master Administrator may create multiple folders containing subfolders. Files can be uploaded to these folders. Users who wish to download the files need to register themselves as members (and get approved by the Administrator). Members can be assigned to different groups with each group having different access permission to different folders. Other features include multiple Sub-Administrator, email notification upon file upload and approval, various access logs, file extensions allowed, maximum filesize allowed etc.
