@1 Graph Generator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script reads information from MySQL database and generates "value vs. date" chart images graphically, with data analysis shown. Graph data can be manually entered or imported from a tab-delimited text file (export/import: Microsoft® Excel or Microsoft® Access). Data can also be entered on a day-by-day basis - useful for stock exchange, foreign exchange, commodity prices etc. One or two graphs can be shown per page. Support unlimited sets of graphs. You can even use different templates for different graphs.
