

# @1 Helpdesk XP PHP

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

An intelligent web-based helpdesk system. It adopts a more effective ticket sorting/ranking method besides the new "closed ticket" feature. It supports quotation boxes, image icons in messages, quote of the day, flagging, search, multiple administrators, ticket categories, automatic reminder to customers to read messages etc. You can even tell if your customers have read your replies.
