

# Atom PhotoBlog

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The word "Atom" in the title indicates just this fact - we have created a kernel of such a blog, there's nothing missing, but also, there's nothing nagging. Thus, these scripts perform extremely good. Features: 1. Small code makes the script work really FAST. 2. Very easy and intuitive user- and admin-interface. 3. Build-In resize of pictures exceeding maximum size. 4. Automatic thumbnail creation. 5. Moderated comments captcha protected. 6. Atom 1.0 and RSS 2.0 feed. 7. (Multiple) tagging. 8. Completely CSS-based! 9. W3C-Clean: XHTML-, CSS-, ATOM 1.0-, and RSS 2.0 tested at the World Wide Web (W3C) consortium. 10. Object-Oriented PHP5: The whole code is based on classes. Hence, the code is easily extensible.
