<b>Email</b>	{value_email}

Auction module is an addon to script which can be used in different ways: as classifieds system, web-based inventory management script or even light content management software (CMS). This module allows to start your own professional online auction web site based on Esvon Classifieds engine. This is real time auction software package designed to be easy to operate allowing for flexibility and growth as your business expands. Auction details : Open Auction format. There is no reserve price in this auction format. The item must be sold to the highest bidder, regardless of the closing price. Admin can configure auction functionality to be enabled for certain fieldsets (categories) and price plans only
