Audiolsland 2.0 Professional is a web-based Audio Management Website Application. It is designed for the website owner who wants to quickly upload audio files to their own website using a web browser, then share them with others online using webpages from within their site. Audiolsland 2.0 comes with many cool features, including the ability to upload audio files, playback of all the major audio formats (.wma,.wav,.au,.mp3,.swf, .mov, etc.), support for all the major audio players (Windows Media Player, QuickTime, Real, Flash), playlists, and web page audio playback. Audiolsland also allows you to create logins so users can manage their own audio online using your site. Audiolsland is an XHTML and CSS compliant website product. Installation of Audiolsland is as easy as uploading a folder to your server! No database setup required, no desktop software, no Flash plugins, and no registration. Requires IIs website (Windows), ASP/ASP.NET support, and read/write permissions.
