

Authentication Tutorial

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a quick and easy guide to building an authentication system in ASP. First, it explains Authentication: What it is, how you work with it, and what options are currently available to you. Then, it explains each choice in more detail to help you decide which is the best way for you to authenticate your web users.
