

Auto Backup

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Automaticlly backup your critical data to a local disk, the Network or FTP servers. Backups & restores are amazingly simple. You can create multiple tasks to backup your data manually or automatically. You can select files to restore to the original or a new location. Integrated encryption, compression, and you can use password protection. You can create self-restoring archives. It can work as a Windows NT/2000/XP service.
