

Auto Directory Index PHP Script (AutoIndex)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Makes a table that lists the files in a folder, and lets you access the files and subdirectories. Also includes links to each file, icons for each filetype, and the ability to search for files. It also has the option to log access to files and folders and includes a built in anti-leech system.
