

Automated Spam Protection Utility

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The spam protection tool prevents email address harvesting from your website, while preserving the ease of use and flexibility of standard e-mail links. With the automated utility, webmasters can submit contact pages with many email addresses to protect, and non-technical users can avoid having to deal with HTML altogether.
