

Automatic E-mail This Link Script with Auto-Capture and Validation

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script automatically captures the title of the current page and the url of the current page and sends them via the user's e-mail client to an address entered in a box on the form. The e-mail address field is also checked to see that it is not empty, and that the e-mail address is in valid format.
