

# Automatic MySQL Backup

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Using cron, mysqldump (included with MySQL) and gzip, this script will take daily weekly and monthly backups of your MySQL databases. Daily and Weekly backups are automatically rotated. Output log can be emailed to whoever is responsible for maintaining the backups. Can create a single backup file for all databases on a server or a separate backup file for each backup. Plus a number of other features. See changelog in the script for full change history. Remember to rate it..
