Automatic Timed Self-Closing Popup Window

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

Opens a popup window that will close itself after a pre-set time. The popup can be launched from a link in your page, or automatically when the launching page loads. Very well behaved -- does not launch multiple windows on re-clicks, and the popup comes to the front when it loads.
