AVConference 1.2 is a fully featured flash audio video conference software that runs in the browser like any other flash application. It has an intuitive and easy to use(drag&drop) flash user interface. It supports many 2 many real time audio and video streams with automatic webcam and mic detection. It has an enhanced text chat with bad words filter and formatting options. There is also a users list with gender/camera/mic/admin icons, rooms support with private and public rooms. You can limit video time and video speed for users, you ca also limit the number of simultaneous incoming video streams they can watch. It has a separate moderator interface from where you can kick and bann users, delete and create rooms. It keeps text logs of the text chat on the FMS/Red5 server for later review.
