<b>Email</b>	{value_email}

AWS HTML Producer is an enterprise-level HTML processing solution that not only provides advanced HTML template parsing features, but also extracts virtually any data from any web site! Among dozens of other cool features, new version has full support for nested tags and lets you select information for extracting simply by search string or RegEx pattern. Extract the latest stock indices, currency rates, weather, news and more with a few lines of code! See demos on the web site.
