Mobile Number	{value_mobile_number}
Email	{value_email}

b2 is a set of scripts designed to ease the process of publishing news to your homepage, or weblog. It features add/edit/delete posts, a search function, post categories, readers' comments, lead-in, multi-user management (self-registration), bookmarklets and sidebars posting, GreyMatter and Blogger importer scripts, an XMLRPC interface (Blogger API), ping to weblogs.com (and cafelog.com), in-context preview, file/image upload, RSS syndication, and a templating system that makes it possible to output the data in any format (an online template/file editor is included). It also allows you to post entries via email. Requires PHP 4.0.5 and MySQL.
