BackupToNet is a data backup software that allows users to secure, automated backup of their computer data. Data backup can be done to online servers, local or network drives. Backup of data is done in a secure and automated manner for ease of use. Users get 100 MB free web space in Backup2net secure server for file backup. The scheduler allows you to set up automatic backup of specified data to your computer hard drive, or zip drive or even online web space. You can select the files, folders to be backed up daily, weekly or monthly. No more losing critical data/files because of a hardware/disk failure or damage/theft of removable storage media like tape/CD. Saving your critical data in our secure servers ensures that your files are safe for restoration at any time, even if your local system crashes or your removable media is lost or damaged. You can restore your files from any computer with an internet connection.
