Email	{value_email}

User based check-in and check-out, version control and tracking, ability to view or revert to old version, and tree structured document repository are just a few of the reasons this robust, professional-grade, web-based, access-anywhere, document management solution is so powerful. With DocWatches(tm), and DocFlow(tm), documents can be automatically checked out and forwarded to the next person in line when checked in. Or if you wish, receive a text message on your PDA, mobile phone, or pager when a document's status is changed.
