

BigPrism Dynamic Countdown Timer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

BigPrism Dynamic Countdown Timer works like no other countdown timer available on the net. It is dynamically generated by CGI script that resides on your server, everytime somebody visiting your site. That CGI script calculate required countdown time individually for each visitor and then prints JS directly in their browser with required countdown time values. It is very flexible and fully configurable.
