BizDB Advance is a flexible and yet affordable Web database software which has everything you need for the setup of a searchable database application on any small to medium sized Web sites. Each copy of the software comes with an in-built database manager, an image uploader, a search engine program, a search report generator and a comprehensive user documentation. You can use this software to support any number of database fields. Database records can be password-protected. All database interfaces are controlled by Html templates which can be setup by anyone with basic Web page design experience. No CGI programming knowledge is required. Numerous add ons can be ordered separately.
