BNB Virtual Greeting Card Generator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script allows you to provide a Virtual Greeting Card service to your site's visitors. It is a rather simple concept. The goal is to allow a user to create a small HTML file and e-mail a recipient the URL with as little input as possible. Its main features include: SOCKET based e-mail for cross-platform execution, Easy to install, and to customize, E-mails the recipient, User defined text and background colors, Complete script in one source code file, No security headaches, Midi file support, E-mail capture log, Handles multiple card pages from one script, Automatically purges old cards based on age, and Allows selection of background image.
