BoboMail

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

BoboMail is a webmail application, which provides mail access through a web interface. Features include: read, write, reply, forward and delete messages; send and receive attachments; decodes quoted-printable, base64 and uuencoded; handles HTML-mails properly (with inline images!); does not need Javascript; direct support for various MIME types; works with POP3-servers or spool-files (no need for IMAP4); easy to modify and customize through HTML-templates; modular design provides easy interface for other authentication methods and mail protocols; and provides optionally its own fast multithreading webserver (BoboMailHTTPD); multi-lingual support (i18n) - currently English and German.
