BrainCode's SlideWays slide-show applet holds up to 100 images, and scrolls in any of four directions. Images can be different sizes, with each image individually linkable (url and target or frame). Images have separate borders and frames, and can be auto-aligned in the applet. Link hotboxes follow each image, and sound on mouse-clicks is supported. SlideWays features smooth scrolling and flexible parameters for stunning layout effects, and works well with larger images. Ready-to-run demos, cut-and-paste code, design examples, and both detailed and quickstart documentation come with the FREE download of this small, fast applet.
