

Braintree Magento Payment Gateway Extension

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Braintree Marketplace is payment gateway splitting extension developed by Apptha. This Magento based extension eradicates an Admins need to manually split commission from vendors. Instead this payment gateway automatically calculates the commissions and splits the payments between the admin and the vendor. Further, this Magento extension enables admin to put the payments on hold in Escrow for a certain period of time. During this period, both the admin as well as the merchants cannot access the payments. In case a customer asks for a refund, the admin can make the payment void and refunds will reach the customers within a short time span.
