

Browser redirect script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a DHTML redirect script that sends your visitors to three different pages, depending on whether she is using NS 4+, IE 4+, or neither. It's a fool-proof way to ensure that only the intended browser gets to see and run a browser-specific DHTML script.
