Browser & Version Redirect

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

If you maintain separate pages for Netscape and Internet Explorer browsers and want to additionally divide each browser's page into version pages, this script is for you. The script will create a link (or can be changed to automatically redirect) to browser[version number].html. (For example, a visitor with Netscape 4.5 would see a link to netscape4.html)
