Email	{value_email}

Bugify is a powerful, yet simple PHP-based bug tracker. You can use either MySQL or SQLite to store the issues. Bugify comes with a companion mobile app for both iPhone and Android which lets you keep on-top of your bugs while out and about. Bugify has a range of powerful features like git/SVN integration, milestones, following, notifications, easy software updates, API, history tracking, search, and so much more.
