Bugs Manager

Address   {value_address}
Contact Person   {value_contact_person}
Mobile Number   {value_mobile_number}
Email   {value_email}

Track bugs, manage projects, report issues, assign tasks, keep everyone up to date. Eliminate overlapping work, improve response time, reduce project completion time, improve the overall project cycle. Manage any project effectively with Bugs Manager. Unlimited users, project managers, and system administrators. Full ASP source code included. Intuitive administration area. Lots of new features added with version 1.5, including the ability to add custom input fields when submitting project feedback (e.g. version number, client number, etc.). It's what we use every day here at Early Impact to manage all of our projects.
