

Bullschmidt Bar Chart

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Free ASP bar chart tool built as a pure ASP class so there are no components to register. If one puts the cursor over a bar, in most browsers its value is shown as a tooltip. Tooltip and y-axis values can be rounded and formatted to look like \$1,234 instead of 1234.12.
