Car Portal is an advanced & responsive php script for creating multi-user and multi-dealer auto portal websites. The first version of Car Portal was released in 2005, since then it was constantly improved and used on many websites in different countries in the world. It's a web based software, which can be easily installed to create an auto classified portal website allowing the users, private sellers and car dealers to post vehicles for sale, make searches and others and for the administrator to manage the website. It features also the possibility for the car dealers to create their own websites with their listings, design and information on them, for the administrator to manage the vehicle types (cars, motorcycles, trucks etc.) and add additional ones, as well as to add new fields for them, featured ads, banners, newsletter for the users and many others. It's also provided with the full not encrypted source codes, free installation and support and free powered by removal.
