CataBlog

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Does not require any understanding of html or css, but if you have even the most basic knowledge of these technologies you will be able to do so much more. The latest version of CataBlog introduces a new "Public" feature, which allows you to automatically generate individual pages for every catalog item. These pages will get their own Permalink and should be considered similar to a public post or page. Also, each CataBlog Category will get its own Permalink, which will display catalog items in a similar fashion to your other blog category pages. There are a lot of possibilities of what you can now do with CataBlog thanks to the new individual pages
