Categories

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is an ASP category system that runs from an Access database. All the categories are stored in a table with their parent relationships - allowing for an unlimited depth of sub-categories. It is similar to a portal like Yahoo where it lists the first three sub-categories under these main headings.
